Dear Friends,

I have to tell you how grateful I am that you exist!

You see, by the predictions of the experts I am not supposed to be able to do what I am presently doing: Walk normally and be without pain.

Let me explain.

Three months ago, on August 12, some car decided to drive in front of me while I was crossing an intersection. I landed in the hospital with 12 fractured ribs, a fractured sternum, a fractured right tibia and and a cut and bruised forehead.

The bone was put together again with a plate and four screws and then I was put to bed, and expected to stay there for a while.

Instead, I started to move around on crutches after a week, stopped taking painkillers after nine days and got myself shipped home two days later.

How come, you ask? It's all because of NAG!

A compassionate and generous friend brought me a bottle of your fabulous N-acetyl Glucosamines, and there is no doubt in my mind that they are the reason for a healing process that I could observe day by day. Truly, and without exaggeration, the difference that every day made was noticeable, measurable, recordable.

My friends call my recovery from remarkable to miraculous. I, myself, think of it as proof that our bodies are ready and able to repair themselves in short order when we give them the materials they need to do it with.

So, once again, thank you for being there, and for giving us a chance to do the best for ourselves.

Sincerely,
